SKILLS

Front-End: React, Redux, JavaScript, MUI, Bootstrap, html, Css

Back-End: Node.js, Express.js

Databases: MongoDB, MySQL

Cloud: Aws, Docker, Jenkins

Dev Tools: VS Code, Git & GitHub, Jira, Figma

Experience

KEYSTACK TECHNOLOGIES

Full Stack Developer

1. TESCO MOBILE

DEC 2022 – PRESENT

Tech Stack: React, Redux, RTK, Node, Express, Jwt, JavaScript, Git, HTML, CSS

Description

Tesco Mobile web application is designed to provide administrators with comprehensive insights into customer experiences on Tesco Mobile devices. This web application tracks and addresses issues such as call drops, network signal strength, latency, and instances of no network coverage. By monitoring these problems, administrators can ensure a more reliable and satisfying experience for Tesco Mobile customers.

Roles & Responsibilities

- Collaborating with team members to understand project requirements and designing software solutions that meet those requirements.
- Design and implement responsive user interfaces using React.js to provide Tesco Mobile admins with detailed insights into customer experiences.
- Integrate RESTful APIs, enabling real-time data retrieval and visualization for signal strength, signal drops, and user issues.
- Use GitHub for version control, maintaining a clean and organized codebase with proper documentation.
- Actively participate in daily scrum meetings, sprint planning, and retrospectives to align development efforts with project goals and timelines.
- Collaborate with cross-functional teams to address any blockers and ensure smooth project progression.
- Manage and track development tasks, bugs, and feature requests using JIRA.
- Provide regular updates on task progress and collaborate with team members to resolve issues efficiently.

Front-End Developer

2. Trulia

MAY 2021 – DEC 2022

Tech Stack: React JS, JavaScript, Material UI, Node, Express, JWT, HTML, CSS

Description

Trulia is an online real estate platform designed to help users find homes for sale or rent across the United States. Trulia offers a comprehensive and user-friendly experience, featuring detailed listings that include property photos, descriptions, pricing, and neighborhood insights. The platform provides valuable tools such as interactive maps, school ratings, crime statistics, and amenities information, helping users make informed decisions about their next home.

Roles & Responsibilities

- Developed responsive and dynamic user interfaces using React.js, Material UI, Styled Components, CSS.

- Implemented interactive features like property search, detailed listings, and interactive maps, providing a seamless user experience.
- Optimized front-end performance, reducing page load times and improving overall application speed.
- Utilized state management libraries Redux to manage application state efficiently.
- Integrated RESTful APIs to fetch and display real-time data, enhancing the interactivity of the application.

Software Engineer

3. HP SERVICES

OCT 2020 – MAY 2021

Tech Stack: React, Java Script, Redux, Material UI, HTML, CSS.

Description

HP Services provides comprehensive solutions for troubleshooting user issues, ensuring optimal performance of HP devices. The service includes downloading and installing drivers and software updates to keep systems up-to-date. It also offers robust security services to protect devices from threats and vulnerabilities. HP's expert support assists users in resolving technical problems.

Roles & Responsibilities

- Developing and implementing efficient and user-friendly UI using HTML, CSS, JavaScript and React.
- Writing clear, well-documented and maintainable code that follows coding standards and best practices.
- Pioneer the adoption of Jira within the development process, improving project tracking and cross-team communication.
- Utilized state management libraries Redux to manage application state efficiently.

EDUCATION

- Bachelor of Computer Science (BSC) – 72%
- Intermediate (MPC) – 60%
- SSC – 7.2 GPA
